

# LE SUEUR INCORPORATED BREASTFEEDING FRIENDLY WORKSITE

Le Sueur Incorporated actively participated in the Le Sueur Worksite Wellness Collaborative, which included members representing schools, business, and other community groups and was facilitated by Brown, Nicollet, Le Sueur-Waseca Statewide Health Improvement Partnership.

The company's commitment to a family-friendly workplace led to the opportunity to collaborate with SHIP to create three mothers rooms:

- To enable parents with young children to continue working and earning
- To support lactating mothers who choose to continue feeding their children breast milk after returning to work
- To encourage more women to work in manufacturing
- To leverage the impact of business and government partnership to impact the surrounding community

*As a family owned business we understand the importance of family and know that great people are the key to our success; therefore, we are committed to creating an environment where people reach their potential and where families are supported. Improving health outcomes requires strong private and public partnerships." - John Depree, Human Resources*

BNLW SHIP funded three newly created mother's rooms, assisted in creating a policy and helped LSI apply to become recognized as a breastfeeding friendly worksite by the Minnesota Department of Health.
