

# **Breastfeeding Friendly Applications Moving On-Line**

MDH is pleased to announce the Breastfeeding Friendly designations for workplaces, childcares, health departments and maternity centers are moving to an on-line format. The transition is intended to make the application process easier.

All the designation applications are in the writing and testing phase now. Each will launch, or go live, separately.

The first designation application to go live will be the workplace application followed by the health department, childcare and maternity centers. The workplace application will launch mid-July. Dates for the health department, childcare and maternity center applications to go live are yet to be determined.

MDH is very excited about this transition. There are currently over 70 workplaces statewide designated as breastfeeding friendly.

See the list of all the designated workplaces, health departments, childcares and maternity centers here:
